

VitaEase

Don't let your migraine headache stop you from enjoying life. We at Vita-Fuse empathize with those suffering from the debilitating effects of recurrent migraines. That is why we created an infusion specifically designed to alleviate migraine symptoms. We combine IV hydration, magnesium and B vitamins with IV prescription medicine shown to be effective at relieving migraine symptoms.

0.9% Normal Saline 500-1000 ml of fluids.

B1 (Thiamine) is an essential component of the body's metabolic machinery. It is also important for proper cardiovascular and neuromuscular health.

B2 (Riboflavin) is vital for carbohydrate, fat and amino acid metabolism. It also serves an important role in cardiovascular health, collagen formation and reducing signs of premature aging.

B3 (Niacin) is renowned for its cardiovascular benefits. It is also known to improve mental function and repair damaged skin.

B5 (Dexpanthenol) is required for the production of coenzyme A. Coenzyme A is fundamental to the metabolism of fatty acids for energy.

Magnesium plays an active role in over 600 biochemical reactions in the body including muscle relaxation, nerve signal conduction, regulates metabolism of proteins, DNA, fatty acids and carbohydrate.
